### Family Resort Hotel Manora

We are actively taking measures to reduce our negative environmental impacts by promoting:

- Renewable energy sources
- Efficient use of energy and water
- Reducing waste generation

The eco-label is the official eco-label of the Association of small and family-run hotels of Croatia, which marks "green" hotels that have less adverse effects on the environment compared to other hotels. The eco-label is proof that the hotel meets highly prescribed environmental standards.

This sign is a proof of excellence and quality with which hotels show their socially responsible business. On the other hand, European tourists accept it through personal choice as an additional confirmation of quality under the slogan: GOOD FOR THE ENVIRONMENT, GOOD FOR ME !

There are three levels of the eco-label of the Association of Small Family Hotels:

- Silver - achieved 22 mandatory requirements and additional 5 points from non-mandatory requirements;
- Gold - 22 mandatory requirements and additional 10 points from optional requirements were met;
- Platinum - 22 mandatory requirements and an additional 22 points from optional requirements were met;
  - The platinum level of the eco-label is identical to the requirements of the EU Ecolabel

Family Resort Hotel Manora has received a platinum eco-label from the Association of Small Family Hotels.

Date: 23.4.2022.

Manager: Ronald Spišić
